<p>Count Around You! Walk outside or inside and practice counting things like windows, doors, trees, rocks, silverware, and more!</p> 	<p>Find a bag and collect items to go in it that relate to a story you have read. If you can't find an item, draw a picture to put in your bag.</p>	<p>Keep a record of the weather every day this week. Record the temperature (high and low), describe the weather (sunny, cloudy, rainy, windy, etc.), and draw a picture.</p>	<p>Make a musical instrument out of household items. It could be a drum, a string instrument, a cymbal, or a tambourine-like instrument, etc.</p> 	<p>Create a new form of tag to play outside with your family (when the weather is nice). Create your own rules and play for 20 minutes or more!</p>
	<p>Write a list of things that make you happy, things you're grateful for or things you are good at. Decorate your list with pictures!</p>	<p>Draw a map of your home, neighborhood, or local area. Create a key or legend to identify or highlight interesting landmarks.</p>		<p>Play Dance Freeze. Put on some fun music. Have someone control the volume. Every time the music stops, you must freeze until the music stops again!</p>
<p>Draw shapes on a piece of paper. Find these shapes inside or outside. Each time you find a shape, make a tally next to that shape on the paper. How many can you find?</p>	<p>Pick two of your favorite stories. Make a list of ways that the stories are similar, and a list of how they are different! Tell a family member about your lists!</p>		<p>Design a 5-panel comic strip illustrating something funny that happened in your house recently! Draw your family or create new characters!</p>	<p>Create an obstacle course inside or outside. Try to go through your obstacle course at least three times in a row.</p>
<p>Grab a hanger, string, and household objects to create a balanced mobile.</p> 	<p>Build a reading den! Find somewhere cozy, snuggle up and read your favorite book. Or create a reading fort with blankets!</p>	<p>Make a list of all the electrical items in your home. Can you come up with ideas to use less electricity? Decide which actions you can take this week to conserve electricity.</p> 	<p>Find an old sock and create a puppet. Create a sock puppet family and put on a puppet show!</p> 	<p>Make a list of as many vegetables you and your family can think of. Draw pictures next to the ones that you have eaten!</p>
<p>Draw a picture using at least 8 mathematical shapes. Create a landscape, an animal, or an imaginary creation.</p>		<p>Write a thank-you note to a hero in your community that has helped you and the larger community. Focus your note of thanks on their roles and responsibilities in the community.</p>	<p>Use an empty toilet paper tube to create a new invention. Draw on it, color it, fold it, whatever, to create a new invention. Describe what it can do or what problem it solves!</p>	<p>Write a rap or a song about healthy foods. Write about the healthy foods you like, or the ones you don't like yet!</p>

How many of these non-computer activities can you do this week?

Can you complete ALL of the activities?

Challenge your family members & friends (virtually!) to see who can do the most!

WCPS Students,
We miss you and hope to see you soon! We hope you are reading a lot, practicing math, being inquisitive and creative, and getting lots of exercise!
